Stock Pathshala Curriculum - Beginner's Module

Course Introduction

In this Beginner level course, we teach you from the very basics and fundamentals of trading and investing in the stock market. This entails basic topics such as Trading classes, industry and sector types, technical jargons to relatively complex topics of technical analysis basics, fundamental analysis basics and more.

If you attend this course, you will get a glimpse of the vast field of financial markets. This beginner course is the first step to create a powerful knowledge bank on various tools and techniques required for the understanding of capital markets in depth. This course aims to create stock market professional by giving them strong conceptual knowledge along with practical exposure.

This Course is suitable for you if you are:

- Looking to enter into stock trading and make consistent profits
- Tired of wasting your hard earned money and paying high brokerage charges to full service brokers for research
- Cautious enough in not trusting fake advisory firms and getting yourself looted.

Course Structure

In this Beginner's course you get:

- Online and offline study material
- Real time demonstrations of trading platforms
- Practical exposure of technical and fundamental analysis
- An open platform to interact with market experts
- Balanced exposure of theoretical and practical aspects in detail

The whole beginner's module is bifurcated into 4 different modules spread across 8 one to one video classes overall.
